

I am a General Aviation pilot.

I have been flying since 1963.

I built and fly my own aircraft.

At the present time I can barely afford to fly due to the price of fuel, storage, maintenance and Insurance.

Requiring the change to a very expensive ELT will put me out of the air.

I rarely venture 25 miles from my airport as I fly mostly aerobatics.

Please rethink this rulemaking. Let us keep our 121.5 ELT's.
